Thank You Community

The City of College Place would like to thank you, the community, for working with the City and the contractor during the Larch & 4th Overlay Project. Your cooperation, patience, and understanding during this project was much appreciated and assisted in the timely completion of the project. The City would also like to thank Humbert Asphalt for the excellent work their company did in the completion of the project. The project was timely and within budget. The City hopes all residents of College Place are enjoying the road improvements made in the past few months within the city limits.

Doing Work without a Permit?

Occasionally, a homeowner will begin a building project or upgrade to their homes without a permit. If you are unsure if you need a permit, CALL! A simple phone call can save you time and money.

- Improper placement of a shed or addition to your home could result in the structure having to be removed or relocated because it did not meet property setbacks.
- Beginning a project without the plan review could result in having to buy different building materials to meet code.
- Starting a project without the proper permits may result in your fees being doubled.

These are just a few samples of the problems you could run into by starting a project without the required permits. Remember, a simple phone call can save you time and money. The Building Department can be reached at 509-525-0510.

Water Conservation tips for October

- If your toilet flapper does not close after flushing, replace it.
- Keep a bucket in the shower to catch water as it warms up or runs. Use this water to flush toilets or to water plants.
- Use the garbage disposal sparingly. Compost vegetable food waste instead and save gallons of water every time.
- We are more likely to notice leaks indoors, but don't forget to check outdoor faucets, sprinklers and hoses for leaks.
- When doing laundry, match the water level to the size of the load.
